EDUCATION

University of Waterloo

Honours Computer Science, Minor in Combinatorics and Optimization

Waterloo, ON

December 2027

Awards: Hugh Heasley Engineering Award (\$10K), WiCS Grace Hopper Scholarship (\$2K), Hack the North Microgrant (\$2K)

EXPERIENCE

Software Engineer Intern – Aurora MySQL

May 2026 – Aug 2026

Amazon Web Services

Toronto, ON

- Built a **Rust** binlog aggregator, merging N **node streams** into one globally ordered, **MySQL-compatible** output
- Designed **C++ engine support** for distributed-transaction metadata and ordering semantics for Aurora cluster routing
- Implemented backpressure across **variable-rate streams**, sustaining **13K+ transactions per second (TPS)** with automatic reconnection, checkpointed recovery, and deduplication

Software Developer – Full Stack

Sept 2025 – Apr 2026

Blueprint University of Waterloo

Waterloo, ON

- Launched a web application for a women's shelter using **React**, **TypeScript**, **GraphQL**, **Node.js**, and **PostgreSQL**
- Co-developed a reusable **TypeScript UI component library** that reduced code duplication by **40%** across pages
- Owned a reporting feature for scheduled operational CSVs, reducing manual spreadsheet entry by **70%**

Product Management Intern – AI Agents

Jan 2025 – Jul 2025

Pepper Pomegranate Inc.

New York City, NY

- Led development of an **AI-powered order inbox** that transformed text and voice orders into structured ERP orders
- Managed user experience and parsing accuracy for **8 clients**, **500+ orders**, and **40+ weekly hours** of efficiency gains
- Coordinated feature rollout of language translations (text + voice), worksheets, and multi-write synchronization
- Designed **issue-specific logging** with configurable log levels and output routing for parsing failures, timeouts, and stale data, cutting diagnosis time by **75%**

Solutions Engineer – Operations

Sept 2023 – Dec 2023

Pepper Pomegranate Inc.

Toronto, ON

- Built a **PDF-to-JSON ingestion pipeline** with logging and alerts, automating **5%** of total inbound client orders
- Resolved bad-data issues in ETL pipelines, restoring application updates and reducing integration downtime by **30%**

Software Engineer Intern – Robotics

Jan 2023 – Apr 2023

Kindred AI Robotics, acquired by Ocado

Toronto, ON

- Built **Python** tooling to containerize robot simulation stacks with **Docker**, reducing startup time by **70%**
- Extended automated test coverage to **95%** in **Python** and **Cucumber**, executing in a virtual simulation environment
- Processed **8M+ robot-cycle logs**, flagging performance bottlenecks and reducing robot-picking system downtime

PROJECTS

text ur mac | Multimodal Desktop Automation Agent

July 2026 – Present

- Built a **computer-use agent** that controls a Mac through **iMessage** and **FaceTime**, routing text and voice requests across desktop actions, **Notion**, Calendar, web search, and **MCP-connected tools**
- Designed extensible **MCP integration layer**, providing a unified entry point for desktop automation, external tools, and multi-step agent workflows

planck | Android Clipboard Manager

Jan 2026 – Apr 2026

- Shipped a **Kotlin** universal clipboard app for **2,000+ MAU**, supporting offline-first access and OCR-powered search
- Designed secure local and cloud data flows using the **Android SDK**, password-derived encryption keys, and persistent cross-device clipboard storage

TECHNICAL SKILLS

Languages: Python, C/C++, Rust, TypeScript, JavaScript, SQL

Frameworks: React, Node.js, Flask, Electron, Android SDK, GraphQL

Systems & Tools: MySQL, PostgreSQL, Docker, Git, AWS, MCP
